Данное пособие содержит **3000** примеров на сложение и вычитание в пределах сотни. Тема «**СОТНЯ**» — одна из базовых тем курса начальной школы. Как и любая другая тема, изучаемая ребёнком в этом возрасте, она требует внимательного осмыслиения и хорошего закрепления.

Многие родители семи-восьмилетних школьников убеждены, что их дети очень хорошо считают, но полностью можно быть в этом уверенными только тогда, когда навык счёта доведён до автоматизма. В этом случае ответ к примеру ученик пишет по истечении 3-5 секунд.

КАК ПОЛЬЗОВАТЬСЯ КНИГОЙ

На каждой странице приведены 6-7 столбиков по 52 примера. В конце столбика записывается время. В левом нижнем углу обозначены контрольные цифры: идеальное время решения одного столбика, удовлетворительное и результат, который должен заставить ученика призадуматься. Не надо требовать от школьника в это время каллиграфического написания ответов.

Учителю сложно проверить такое большое количество примеров, поэтому лучше, если время, затраченное на решение каждого столбика, отметят взрослые дома.

Чтобы достичь хороших результатов, каждый день надо решать по одной странице.

Пособие можно использовать в качестве дополнительного материала на уроках математики, а также для работы дома.
