Пособие содержит 3000 математических примеров по теме «Счёт в пределах 100». Оригинальное построение материала позволяет обеспечить более глубокое его усвоение.

Как показывает практика, ученик полностью освоил программу, если решает и записывает ответ по истечении 4–7 секунд. В этом случае можно говорить, что навык счёта доведён до автоматизма.

На каждой странице приведены 7 столбиков в среднем по 40 примеров. В конце столбика записывается время. В нижнем левом углу обозначены контрольные цифры: идеальное время решения одного столбика, удовлетворительное и результат, который должен заставить ученика задуматься. Чтобы достичь отличных результатов, каждый день следует решать по одной странице.

Для учеников, раньше остальных выполнивших задание, а также для максимально эффективного усвоения темы в конце каждой страницы даны усложнённые задания – бонусы.

Пособие может быть использовано на уроках математики, а также для работы дома.
