# 3000 ПРИМЕРОВ ПО МАТЕМАТИКЕ

ЦЕПОЧКИ ПРИМЕРОВ  
СЧЁТ В ПРЕДЕЛАХ 100

$$(8 - 6) \times 5 + 5 \times (2 + 1) + 6 \times (4 - 3) - 5 =$$

$$4 \times (2 + 3) - 4 \times (4 - 1) + (8 - 2) \times 5 - 5 =$$

$$8 - (7 - 5) \times 2 + 9 \times (4 - 2) + 18 : (2 - 1) =$$

$$18 - (4 + 1) \times 3 - (4 - 3) \times 2 + 4 =$$

$$100 - 25 - 25 - 13 - 17 =$$

$$90 - 13 - 16 - 17 - 14 =$$

$$+ 27 - 16 - 17 + 24 - 68 =$$

В пособии представлен материал, который поможет сформировать навыки устного счёта по базовым темам второго класса: «Сложение и вычитание в пределах 20», «Умножение на 2, 3, 4», «Сложение и вычитание круглых чисел», «Сложение и вычитание в пределах 100», «Умножение и деление на числа от 1 до 5», «Умножение и деление на числа от 2 до 9». Отвечая на вопросы учителя к каждому из приведённых примеров, учащиеся выполняют несколько математических заданий — всего более 3000 примеров.

Последовательное выполнение заданий пособия поможет ученикам овладеть навыками устного счёта всех форм: беглым слуховым счётом (учитель вслух читает цепочку примеров, делая небольшие остановки для подсчёта, и ученик через несколько секунд отвечает), зрительным счётом (цепочки примеров записаны, а ответы ученик либо сообщает устно, либо записывает), комбинированным счётом (учитель диктует цепочки примеров, а ученик записывает ответы).

Систематическое выполнение этих заданий развивает логическое и математическое мышление, сообразительность, укрепляет память и внимание. По усмотрению учителя цепочки примеров можно использовать как для олимпиадных работ и заданий повышенной сложности, так и для повторения и закрепления изученной темы. Для лучшего усвоения материала рекомендуется решать по десять примеров в день.

Пособие можно использовать на уроках математики и для самостоятельной работы дома.
