The sign of Scorpio

Element: Water

Quality: Fixed

Symbol: The scorpion

Planet: Pluto (Mars)

Scorpio is the eighth sign in the Zodiac. The power that has been generated is now channelled into a rigid mould by its fixed quality of water in Scorpio. The sign's intense emotions are toughened by Pluto and Mars. In autumn life gives way to its place of death on earth. It goes underground. The old forms decompose. Darkness prevails over light. The days become shorter than the night. The sun no longer rises high above the horizon. In response, the green world dies and its juice goes back to earth. The organisms of rot and decay, appear as if by magic. All existing elements are mixed and pave the way for the birth of a new life next year. It's time to abandon yourself. Giving up our life now, thanks to the disintegration and liberation of elements, a foundation is created that will nurture the birth of life next year. Only through such death and disintegration can we feed the new life of spring.

The myth of scorpio

According to Greek Mythology, the constellation of Scorpio is closely related to the history of Orion. Legend tells that he was the son of Poseidon and was famous for his strength and handsome. He was the most handsome man alive. Many girls could not resist his charms. He was a passionate hunter and often boasted that any animal can kill. He and Artemis were hunting partners. According to one version, Artemis did not love him and sent him a small poisonous scorpion that stung and killed Orion. According to another version, Orion fell in love with Artemis and they began to have mutual feelings and they forgot about their hunting. Then her brother Apollo intervened. Once, when Orion was fishing far out into the sea, he argued with his sister that she would not be able to get into the small black dot on the horizon. Artemis accidentally shot Orion in the head thinking she was shooting Scorpio. Any way, Orion and Scorpon died together and were placed by Zeus in the sky, and opposite each other. It seems to the poet that Orion is fleeing from the little Scorpio, who constantly pursues an echo in the edification of all braggarts. Scorpio is a fairly large constellation. A bright star, Antares, is the Scorpion's heart.

The symbol

This sign has a few symbol associations. The astrological symbol of Scorpio is often depicted in several different forms, including the shape of an eagle and a snake, as well as a scorpion. The latter is depicted with a tail lifted up, which contains a poisonous sting. This use of force will cost them their life. Also this symbol can symbolize a phoenix bird, dying and re-emerging from the ashes. This symbol of determination and strength. Its ability to rise above the very depths of darkness. Many a Scorpio shares this ability.

Scorpio: “I wish!”

Late Autumn is the time of the Scorpio. During this period life stops. It is the time of year when there is a delegation of authority on Earth and Pluto rules over the kingdom of darkness. Because of the fear of the unknown, many find solace in sensual, worldly pleasures. The scorpio symbol is similar to the symbolic image of the Virgin. The same three vertical lines are present, but there is no unifying angel wing. Instead there is a raised tail with a poisonous sting. Symbolically, it has been suggested that for climbing, a person needs to first go down to the depths of his psyche, to explore the most hidden corners of his mind, perhaps even die, to be reborn again later. It is a symbol of death and rebirth, as was phoenix rising from the ashes. The stars have the ability to recognize the weakest point in every man, which can be consequential in terms of life events. So be careful! Pluto, which protects Scorpions can have what appear to be magical powers which gives them magical powers and makes them almost invulnerable. The impact of Mars gives them vitality. Perhaps because of this we are somewhat biased towards those born under this sign. Scorpions are very honest, decent people, even if they inadvertently hurt us because they always tell the truth. Scorpions are of extraordinary character: they are often endowed with a strong will, brave to the point of recklessness, and they can also be stubborn and quarrelsome.

They are often extravagant by nature. They can be vindictive and do not forgive wrongdoing lightly. After waiting for the right moment, they can be revengeful. Scorpions are often endowed with great intuition.

Sometimes, they can be irritable and overly suspicious. People in their presence often begin to feel awkward. At the same time they are able to win over people with their persuasiveness.

They tend to love solitude, and often withdraw into themselves. They prefer to hide their inner life, which makes them even more secretive and mysterious.

In love they are often passionate and impulsive. They have strong energy, although they often withdraw when they feel outmanoeuvred by others. At the same time they require complete dedication. With Scorpions it's always all or nothing!

Scorpio – Man

These are real gangsters from criminal detectives. In addition to the intriguing mysterious fate, they have in their arsenal of a number of means that can not leave indifferent women. They have magical charms and magnetism, as well as strong sexual energy.

Alain Delon was born on November 8, 1935 under the constellation Scorpio in the suburbs of Paris. It was a typical bourgeois family. His mother worked as a pharmacist in a pharmacy, and his father was the director of a movie theater. When the boy was four years old, they divorced. Until his mother remarried and the birth of his half-sister, he was raised in a family of relatives.

After changing a lot of schools, Alain Delon goes to St. Nicholas's boarding school, where they decided to make a priest out of him. True, as you know, nothing came of this.

At the age of 17 he enlisted in the volunteer marine expeditionary corps. Alain Delon goes to Indochina, where at that time there is a war. Then, before becoming a famous actor, he goes through a lot of professions, from the waiter to the paid actor, entertaining the elderly ladies.

The adventures of young Delon were very much like the adventures of Lovelace. Many women could not resist the gray-eyed handsome Frenchman. Looking back, the actor says that in life he was given three things well: he knows how to make movies, stupid things and children. He has three of them: the eldest son Anthony (from his first wife), who followed in the footsteps of his father and also became an actor, and two kids: Annushka and Alain-Fabien.

People who know him very well call Alain Delon a narcissist, and the director of "The Return of Casanova" invited him to the main role, where he presented the hero not in the traditional image of a smoothie, but made him a tragic victim of circumstances. Such sympathy for Casanova is not accidental, because who can understand him better than Alain Delon, himself often in such situations.

These women were his wives and German actress Romy Schneider, a novel with which was one of the noisiest kinoromanov of the sixties. They were engaged, lived together for several years, but never got married. Romy was forced to go to Hollywood, where she worked a lot, while Alain Delon stayed in Europe. He starts dating Natalia Barthelemy, and after a while sends a letter to Romy, informing them of their break.

The constellation of Scorpio could not but impose its imprint on him. With his external data, he is very secretive, lonely, unsociable. One of the tragic properties of this sign is the propensity to self-destruct and devour not only their loved ones, but also themselves. His cruelty sometimes surprises, the sharpness does not find a reasonable explanation, but the answer is simple, he lies on the surface: his tender soul is hidden under a thick protective shell. Hence, there are so many broken fates and dissatisfaction with one's own life. Hence numerous novels, the search for supernatural feelings and the tragedy of personal life. As a result, Alain Delon is a handsome man with blue eyes, which all the girls dreamed of, in his old age remains in proud solitude. Is not this the irony of fate and not the sad finale of a beautiful love story that never was to come true.
